

Figure 1. Location of the Lake Menarik Property, south of the Radisson locality. Precious metals and Critical and Strategic Minerals showings are indicated with circles of different colours.

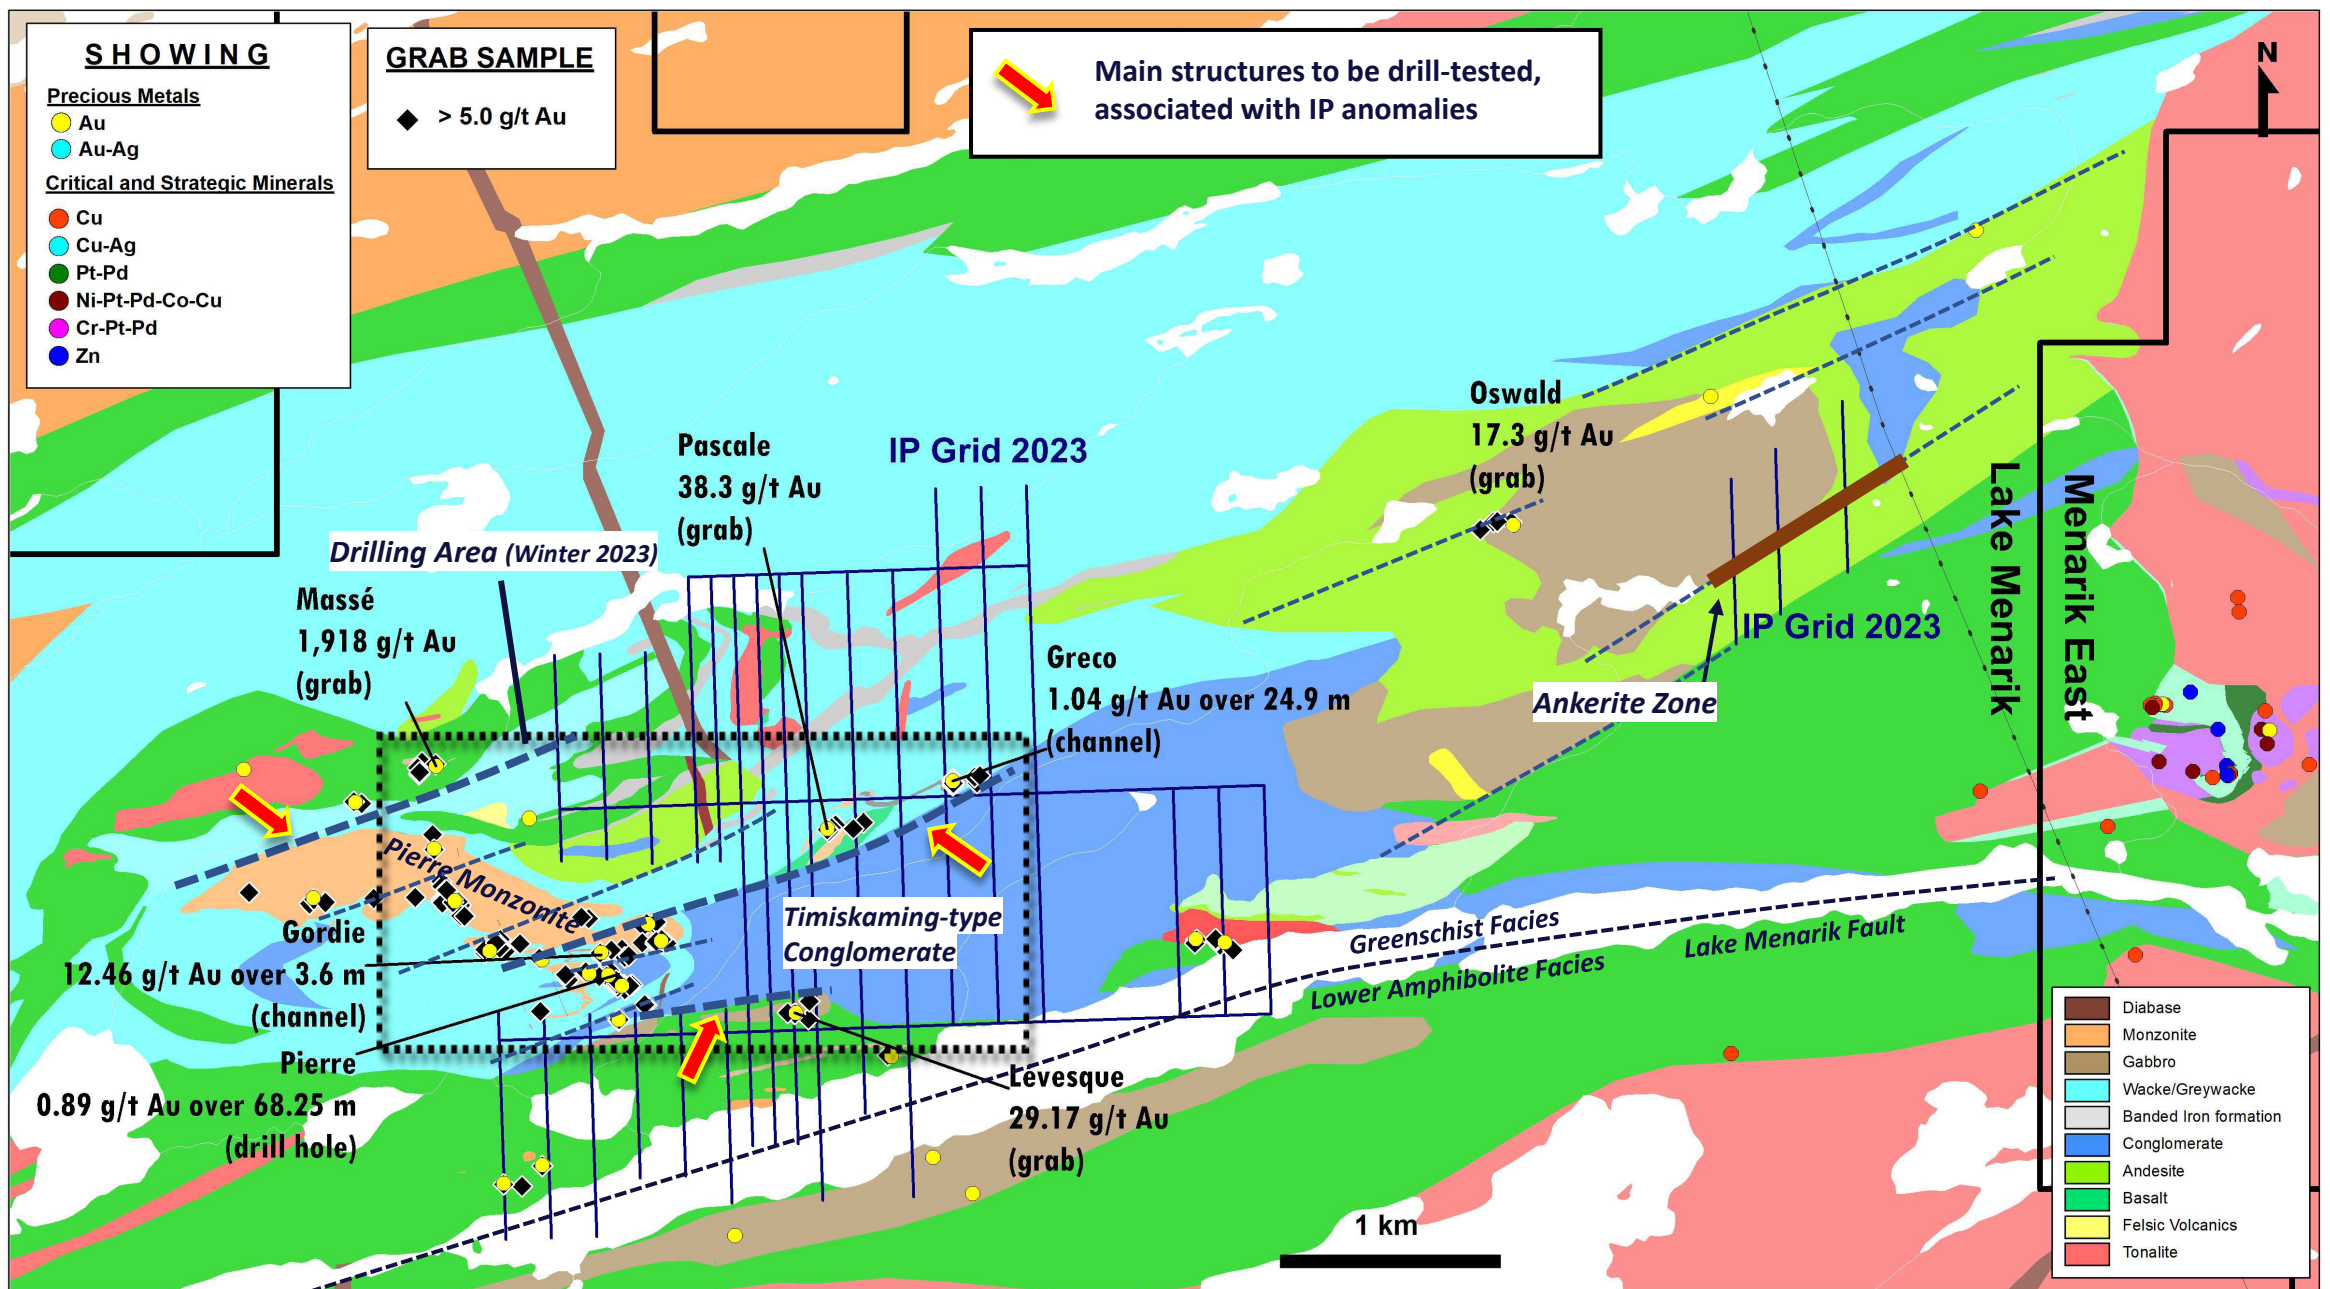

Figure 2. Location of the IP grids and the drilling area for winter 2023 with respect to the Pierre monzonite, the Timiskaming-type conglomerate and the main ankerite zone discovered in 2022. Blue stippled lines represent the main observed and interpreted structural lineaments. Black diamonds are all grab samples above 5 g/t Au.
